

FOR SHORT RUNS. FOR THE LONG RUN. THE TRANSITION TO DIGITAL IS SEAMLESS AND EASY WITH EVOLVE SOLUTIONS

Not since offset came into a letterpress world has the printing industry experienced a transformation akin to the digital evolution now under full momentum, steam-rolling ahead with a wide-open throttle. It's a whole new way of thinking. A profitable way to think about short runs, with short times to market, and even shorter cycle times.

A convenient way to think of just-in-time delivery for customized, personalized and seasonal items. It can accommodate variable data integration for coding and marking. And it can virtually eliminate inventory to stock.

It's an expanded way to think of operational flexibility that can broaden manufacturing capabilities from textiles to wall coverings and flooring; from food decoration to photo finishing; from folding cartons to flexible packaging to printed electronics and many other areas you never considered feasible before.

JUST OF A FEW OF THE MANY NICHE MARKETS MADE MORE ATTRACTIVE BY DIGITAL TECHNOLOGY:

SEASONAL PRODUCTS PERSONALIZED GIFTS PROTOTYPES SAMPLES
PROOFING EVENT GIVEAWAYS CUSTOMIZED PACKAGES NEWS-BREAKING
EVENTS PERSONALIZED ADVERTISING ON-DEMAND BOOKS VARIABLE
DATA CUSTOMIZED APPAREL VERSIONED PRESS RUN TIME SENSITIVE
MATERIALS SERIALIZATION AND DATING...

With digital you can think wide format, super-wide, narrow web, UV flat bed, pre-press, glass, credit cards and more. There truly is a lot to gain with digital. But there's a lot of daunting technology to figure out. And that's where INX Digital can help. We've assembled a team of specialists that know where in the traditional world of printing you're coming from; and know how to get you to where in the digital world you want to go.

We can help you determine what niche you can smoothly integrate into your business model. More importantly, we know all the technology sources out there. We've tested their products. Know what innovations lie ahead. And can recommend what inkjets, printers, toners, coatings, inks and software will provide the best combination for you.

We're INX Digital. We're here to help you evolve with advanced digital solutions.

DELIVERING TECHNOLOGIES THAT DRIVE DIGITAL GROWTH.

DIGITAL INKS AND COATINGS

With a long history of ink innovation dating back over 100 years through parent company Sakata INX, INX Digital brings impressive credentials to the market for its capabilities and success in the development of new ink chemistries.

The company makes customer-driven ink solutions designed for virtually every type of digital printer and print-head technology. Options include solvent, UV LED-curable, aqueous as well as thermal and oil piezo inks. INX Digital offers solutions for printing on vinyl, paper, corrugated, plastic, carpet, fabric, cylinders and other exotic substrates. Applications run the gamut from large-scale exterior and in-store media such as POP, billboards, building wraps and fleet graphics to packaging, metal decorating, labels, plastic cards, interior decorating materials and more.

PRINTER TECHNOLOGIES

In addition to manufacturing specialized inks for a wide variety of digital printers, INX Digital offers its customers advanced digital printing solutions for integration. For Super-Wide format, the San Francisco Series printers offer true solvent solutions, while the Milano Hybrid Series provides options for UV curable printing.

For short run digital prototype packaging and production, INX Digital offers metal decorators advanced digital technology with its MD Series of UV Flatbed Printers and its CP100 UV Digital Can Printer. For labels, direct mail and small packaging, the NW100 UV LED Digital Narrow Web Printer offers unique capability.

STRUCTURED TO HELP ITS CUSTOMERS EVOLVE IN THE DIGITAL WORLD, ALL OVER THE WORLD.

INTEGRATED SYSTEMS

To help your company evolve, INX Digital can provide full workflow solutions for a wide variety of environments. Our unique experience with innovative design development with inkjet systems can provide customer-driven solutions in the areas of inkjet printing, production workflows and material handling. Whether your company is just venturing into the digital world for the first time, or is already there and is looking to expand your digital capabilities, our technology systems can be outfitted to handle a wide range of production situations.

PARTS AND SERVICES

As a full service provider we stock common replacement parts for many of the printers we manufacturer inks for. We have technicians available for on-site ink jet maintenance and repairs. With our restoration program, we can clean and align your ink jet heads and bring them back to near-original condition. We even offer print head diagnostics to determine the causes of premature wear and failure.

CONSULTATION

We are set up to bring to our customers advice on virtually any aspect of digital printing. We have experts in ink chemistry. Experts in electronics. Experts in mechanical engineering. Experts in software. Experts in different global regulatory requirements. And they're all available to meet with you to solve problems, to reach new goals, to help your company ultimately evolve and succeed.
