

## INX International's Environmental Sustainability Agenda

### Energy and Utility Use Reduction to Protect the Environment

- Reduce energy consumption by improving process energy efficiency
- Reduce carbon dioxide equivalent (CO<sub>2EQ</sub>) emissions per unit of production
- Reduce carbon dioxide equivalent (CO<sub>2EQ</sub>) through more efficient product transportation

### Waste Reduction & Landfill Elimination

- Eliminate all landfilling of manufacturing waste
- Reduce manufacturing waste per unit of output
- Increase waste recycling and waste avoidance

### Product Design for the Environment

- Develop environmentally-preferred products using sound environmental design principles
- Utilize product packaging that adheres to the following principles of sustainable packaging: Efficient, Remove, Reduce, Recyclable, Recycled, Sustainable

### Waste Water Reduction

- Reduce total fresh water use
- Maintain treated wastewater quality consistent with best demonstrated technology

### Materials Sourcing & Supply Chain Management

- Utilize environmentally friendly raw materials and develop new products that have the least impact on the environment.

### Social Responsibility

- Behave ethically and contribute to economic development while improving the quality of life of our employees and their families as well as the local community and society at large
- Manage business processes to produce an overall positive impact on society.
